
HOWTO: Play PokerTH Internet Game behind Firewall

Posted by skub - 2007/11/20 16:32

Hi all,

is someone interested playing PokerTH from school network or work/office-network and sitting behind a firewall and a Proxy?

easy to do... IF:

- a) you know your local proxy-server adress
 - b) the PokerTH Server provides a "httptunnel"
 - c) and you are running a "httptunnel"-Client
- direkt-link to download: [link](#)

works perfect for my Server. If someone is interested in a more complete HowTo... drop me a line...

:~)

Hi skub.

Thx for the HowTo. May be you are interested in writing wiki-stuff for this and may be other hints. You are very welcome.

Hi doitux,

now thought of creating a wiki entry about this topic.
However during writing i encountered that i dont know if there is either demand for this or what parts are most interesting.

as this topic has not formed any kind of discussion i am in doubt that someone needs it.

however, if i am wrong i for sure would like to contribute also with an special wiki-page

skub
