
no action in the internet lobby (no join/creaa)

Posted by tatayet - 2008/02/29 20:06

Hello, sorry for my language because im french,
im a new player on poketh and when im connecting to internet, i can't join (no action) and if i create, anybody can join.
anybody have the same problem or the solution?.
thanks

Same problem here... Connecting to the lobby but cant join or create a game...
Worked fine till today.. any ideas?

Do you've got any error messages or a screenshot?

no specific error message, and all buttons have no effect in the lobby (create, join...)

I'm sorry but I cannot reproduce this bug.

This might be a temporary issue (if the server has high load, it won't react instantly), so maybe a bit of patience helps.
Make sure that, when joining, you have selected a game which is not running. Also, make sure that you are using the latest official release.

If there is any way to reproduce this effect, please let us know.

Hi.

I guess you are using the opensuse-package right? The current one is buggy. But there will be an bugfix update soon.
