
Game speed in network game

Posted by blueElephant - 2008/01/02 00:12

In network game the setting for "Game speed for computer opponent" seems to have no effect. The computer opponent always play with the same speed.

I got the same bug ... playing with my freind over network and filled the game with bots.

we both are shown "speed 8" (just the setting i chose at starting the game) but the bots only play at standard speed. very annoying if we both fold and have to watch 5 bots completing a round ...

Same here, we tried both Internet Game and Network Game (via Hamachi) but computer player speed was not changed by the setting. It would be really nice, if someone could fix that, because it really slows down the whole gameplay...

Great work anyway, I really like PokerTH! :)
