## PokerTH & Asus EEE PC, its gotts be possible??

Posted by hey yer barred - 2008/05/11 18:07

---

Hi all

Ive just bought a asus eee pc, and i hated it at first....until i found something called pimp my eee. With some coding I now have full desktop on linux...so i love it now...

I also love poker, so naturally i want pokerth on my eee pc. I downloaded the linux installer and it installed fine, no errors at all. On my desktop is the pokerth program, but when i double click it....it doesnt load.

it tries, but doesnt do a thing :(

im certain the eee pc will run it as it is can run gta vice city and need for speed 2!

if anyone can help me, i would very much appreciate it!

Hi,

it seems that PokerTH does not run on the eeepc due to an outdated glibc on this system. You can try to compile it by yourself. See also

[http://www.pokerth.net/component/option,com\\_fireboard/Itemid,85/func,view/id,1681/catid,17/](http://www.pokerth.net/component/option,com_fireboard/Itemid,85/func,view/id,1681/catid,17/)

and see the wiki for compiling instructions on Linux

[http://www.pokerth.net/component/option,com\\_mambowiki/Itemid,82/](http://www.pokerth.net/component/option,com_mambowiki/Itemid,82/)

(which are unfortunately outdated but could help anyway).

Hi,

Before you go through too much trouble, know that the screen resolution of the Eeepc may be a problem:

[http://www.pokerth.net/component/option,com\\_fireboard/Itemid,85/func,view/id,670/catid,13/](http://www.pokerth.net/component/option,com_fireboard/Itemid,85/func,view/id,670/catid,13/)

So, has anybody got it working on the Eeepc?

heyn

I have a EEPC with WindowsXP and not worked in the resolution that is standard in EEPC 800x480 which is the size of the LCD.

:unsure: :(
