
Improvements and ideas...

Posted by Isidoro - 2008/05/17 14:56

Hello,

Important improvement :

I play with keyboard, and I choose to stop play between each hand (on solo game, and click on the low-right START button to go ahead).

The little problem I found is that I have to use my mouse to click on start. Could you add a hotkey also for that button (STOP / START) ?

... like :

- "ESC" for STOP,
- "ENTER" for START, as START is the only possible action when you ended a hand.

Little improvement :

An option should allow to increase automatically game speed to maximum, to end the hand when you have FOLD. The next hand begins again with your speed choice.

A comment on TO DO :

Last item of 0.7 version is "ranking qualification for open games" : is it really a good idea ? It seems to be the opposite of a Poker Game principle : everybody can play with everybody... and win, even as beginner. Even if other poker website do it...

A question :

PokerTH presently plays only NoLimitTH. In the future, will PokerTH be able to play the other two common variants (LimitTH and PotLimitTH) ?

Isidoro

I casually discovered that START button is activated by pressing (but not documented on the screen like F1-F4).

Regards. :blush:

I think that "ranking qualification for open games" actually means the development of a ranking system aimed to give statistics on wins/losses for each player in internet games.

Take a look there

http://www.pokerth.net/component/option,com_fireboard/Itemid,85/func,view/id,1958/catid,13/limit,6/limitstart,0/

Sounds good for me :-)

Hi,

You are talking about Category 0.7 "user statistics/ranking" :
"Registered user get ranking points (based on won games e.g.) and will be listed on an online-statistic/ranking-site"
This is not a bad idea...

I was talking about that :
Category 0.7 "ranking qualification for open games"
"Registered user can open a game and setup a minimum user-ranking to join the game."

I did not agree with "setup a minimum user-ranking to join the game"...

Attentamente...
