Ranking System - Top 10/100 Players

I think it'll make this game more interesting if you implement ranking functionality. Doing so will make this game lot more popular and I don't think it's that hard to code but it'll be lot more fun.

Ranking can make any good game addictive.

What do other players say? (apart from im good!!! lol :lol:)

Hi iNUKE

Please take a look on Todo/Roadmap (http://www.pokerth.net/component/option,com_todo/Itemid,47/)

Here you will find "user statistics/ranking" and "ranking qualification for open games" which will match your request. So you see it is planned for PokerTH 0.7.
