hi guys, mind replacing that joomla-favicon with a more decent, pokerth-like one? hard to tell apart in my bookmarks (like 12+ joomla's there :huh:)

Ah, your header points to:

<http://www.pokerth.net/images/favicon.ico> -> <http://www.pokerth.net/images/favicon.ico>

whereas a fine pokerth-icon is located at:

<http://www.pokerth.net/favicon.ico> -> <http://www.pokerth.net/favicon.ico>
