
Concept Theme

Posted by vixenfinder - 2008/06/26 03:16

Hello All,

As usual I, not being satisfied with the current graphics, have been thinking on a new skin for the deck. I believe in the next major update there will be skinning support. If that is a planned project, then a good idea i want to run a crossed is to allow the skins to be kept in a zip file but have the extenuation renamed to something like ".pts" (pokerTH skin) as so that skin files can be directly uploaded into PokerTH. This is much the same way Winamp and others support skinning and I believe it is the right way to go. Anywho enjoy the preview and look forward to skinning functionality in the future. <http://img403.imageshack.us/img403/7451/flasyev6.th.png>

I love the current graphics the way it is now. Besides we can already change a lot of stuff. Nevertheless, I enjoy your preview. I am also designing cards, I especially love the heart ones.

Good job !

PS : there are 10 hearts on the 9h in your preview ...
