Excelent user friendly interface.

I normally play the solo game, as i cant connect to the server at work. As a novice player, i would like to see a few of the following to help me improve my game.

- 1). hand odds, and in particular the number of outs for particular hands, maybe the hands tab could change to suite pocket cards.
- 2). Many beginner plays have trouble folding, i would like to know how much money i have lost (not including money won back) over the number of hands played. I have not seen this in any poker player program as yet, maybe its bad to know what u may not have lost, lol
- 3) Player statistics which i think has been requested before

A few interface issues which may allow you space for more features.

- 1) combine the tabs to one box, hands, log, away etc
- 2) Instead of SMALL BLIND and BIG BLIND, put in SB/BB and the amount
