
Not enough time to place bets

Posted by mase - 2008/07/06 23:09

Hi!

I've played games with only 5 seconds time to act.

I think, less than 20 seconds is no good idea.

In a so small time, I often cannot type my bet.

Some time for thinking would be ok, too.

What about to make the minimum time 20 seconds?

How can you all play in 5 seconds?

Yes. I second that request.

I use the slider to set the bets. Normally i set up games with 7 seconds and really like to play it. It is so kind of speed chess or speed PokerTH.

Seems like it would be a useful option to have unlimited timeout... at least for local or network game. i play with people on network and we are all pretty slow/bad/new at poker so the timeouts are kind of a killer.

Yes, this would be particularly good when playing at work where you can only play hands intermitently.
