
Skinning Status? (Status update in general)

Posted by vixenfinder - 2008/07/19 04:10

Hey I've been spending some time designing skins and have been wanting to know how things are going on the PokerTH development end. Specifically if there was going to be a standard skin format that can be created for joining online users can download while the game room loads.

Pretty much just want to hear your thoughts on this. Thanks again.

Hi vixenfinder.

Unfortunately there isn't much time for development yet. Maybe 0.6.3 and 0.6.4 features can be released at on release 0.6.3. After this we start on 0.7. Therefore the next gui-steps will be 10-player table. After this we can bring skinning on the way.

Not really. Some of us have exams another one got a new job and relocate now. So we need some time to get together at pokerth. But as you can see on the roadmap we have ambitious efforts and really want to do it.
