There is no SDK (software development kit) available for the iPhone. You cannot develop applications for the iPhone. So the answer is no :-).

I suggest it because i've read this article:

<http://www.tuaw.com/2007/10/17/apple-we-plan-to-have-an-iphone-sdk-in-developers-hands-in-fe/>

So not for now but in few time i think.

Crdly ben

anyone with an active apple iphone dev account working on a port?

If not, let me know -- I might have some time to work on a port in the upcoming days...
