Hi

Can you please tell me how to reproduce this bug?  
Have you start the second game during a card animation like fade out or flip cards?

Hi,

I don't know how to reproduce it, Happened just once.  
I don't use Pause between hand's.

The not show card was 3d that was in later game shown correctly.  
Also the cards place was high lighted in showdown.

It could been that the system was on 'heavy load' when dealing(drawing) the cards. I got half of the cards back side leaved 'between' the hand cards in later game.
